

Load Station Tailpiece

Loading Station / Tailpiece Unit for Loading Areas

The LST is a complete unit delivered ready to install and run. It can be furnished as a complete tailpiece or as an intermediate loading station for main line conveyor transfers. Tailpiece units are furnished with your specified tail pulley complete with shaft and bearings.

With all components design matched from our single source supply you can be assured of the best fit and trouble free service. Richwood's LST is easy to access for service from beside the conveyor with the belt in place.

The LST is the complete solution to reworking old tailpieces and trying to retrofit components.

Built with components you've come to know and trust, Rely on Richwood!

Integrated system includes:

- *Heavy duty support structure*
- *Impact Saddles® for impact protection and belt support*
- *Canoe Liners® for material containment*
- *Return Slide Idlers for return belt support*
- *RockKnocker gravity V-Plow*
