

# Richwood Canoe Liners®

*Contain Bulk Material and Protect from Impact*

FEATURES	BENEFITS
<b>Rubber base absorbs and dissipates material impact</b>	Reduces or eliminates impact to skirt board and supports as well as fasteners and welds.
<b>Beveled edge matches conveyor trough angle</b>	Liners can be adjusted to almost contact the belt providing the ultimate internal seal for material containment
<b>Modular design fastens to skirt board using bolts or studs</b>	Liners can be adjusted/replaced easily and safely to maintain seal without the use of torches or welder. This helps maintain the integrity of the skirtboard.
<b>Customizable sizes, thicknesses with a variety of material options</b>	Liners are designed per application for maximum results.
<b>Liners are made using the highest quality rubber compounds</b>	Premium quality extends the life of the liners and reduces maintenance requirements.
<b>Rubber based liners reduce noise and material pulverization</b>	Safer work area with lower noise levels and reduced airborne dust.
