

Canoe Liners®

Wear Liner Protection For Your Conveyor Belts

The Richwood Canoe Liner® is made with Rock Flex® 60 Durometer Rubber and is available with our Rock Plate™ ceramic/rubber matrix.

Richwood Canoe Liners® have a beveled edge design that ensures optimum sealing inside the skirtboard to eliminate material spills and leakage. With our industry leading manufacturing flexibility, Richwood offers virtually any configuration to fit any skirtboard liner need. Canoe Liners® incorporate the exceptional wear resistance of the Rock Plate™ ceramic/rubber matrix technology into the internal wear liner design for skirtboards.

Far superior to conventional steel or urethane wear liners, the dual resistance to abrasion and impact provide the best combination for material containment and wear resistance for skirtboard applications.

- *Richwood Canoe Liner's® beveled edge design ensures optimum sealing inside the skirtboard to prevent material spillage.*
- *Available in Rock Flex® 2000 solid rubber or Rock Plate™ Ceramic/Rubber Matrix for extreme material handling conditions.*
- *Single edge bevel or dual edge bevel for reversible wear life*
- *Far superior to conventional steel or urethane wear liners.*
- *Time-saving installation. Modular section design for ease of handling and replacement.*
